RE: NAEDRA Registrars' TDL certification Agency

Dear Mr. Stephey:

Thank you for your Company's interest in our Industry's progress toward interoperability of Smart Grid End Devices. KEMA is recognized as a reputable and respected international company that deals with testing and certification of various products and systems.

The North American End Device Registry Authority (NAEDRA) committee is an organization that represents the three Standards Organizations (IEEE, ANSI and Measurement Canada) in regard to the AMI and Smart Grid interoperability objectives for metering, instrumentation and other End Device functionality. This committee is in need of a reputable and respected certification agency to certify the NAEDRA Registrars' Table Definition Language (TDL) representations of the ANSI C12.19/IEEE 1377/MC 1219, ANSI C12.22/IEEE 1703/MC 1222, ANSI C12.18/IEEE 1701/MC 1218, ANSI C12.21/IEEE 1702/MC 1221 and other Standards that provide lower layer communication support to ANSI C12.19/IEEE 1377/MC1219.

The NAEDRA committee extends an invitation to KEMA to become a certification agency for the NAEDRA Registrars' TDL representations as described above. If your company accepts this invitation, our committee will arrange the necessary documentation, training and procedure testing before the actual certification process is put into place.

Thank you for your consideration,

Sincerely,

A handwritten signature in black ink, appearing to read "Terry L. Penn".

Terry L. Penn
Chair,
North American End Device Registry Authority
